DETAILED ACTION

Reasons For Allowance

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose a simple and stable energy recovery driving circuit for driving a load with a capacitance by comprising a resonant inductor coupled to the load for a charge current or a discharge current to be applied to the load to flow through the resonant inductor, a primary coil of a transformer, coupled to the resonant inductor, the primary coil being coupled to both the resonant inductor and the load so as the charge current or the discharge current flowing through the primary coil when the charge current or the discharge current flows through the load through the resonant inductor and at least one secondary coil of the transformer, coupled to the primary coil; and an energy recovery unit for generating a current according to the predetermined number of turns of the secondary coil in the secondary coil as required in claims 1 and 14.
3. The remaining dependent claims are allowable for at least above reason.
4. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Roh (US Pat. 6,617,802) discloses apparatus for recovering energy using magnetic coupled inductor in plasma display panel driving system and method for designing the same. None of cited/record prior arts stands alone or combination with others discloses all limitation required in claim invention.

Remarks

Amendment filed April 02, 2007 has been entered.

Correspondence

Any comments considered necessarily by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
